

MCPS Public Wi-Fi

Community Wi-Fi Now Available

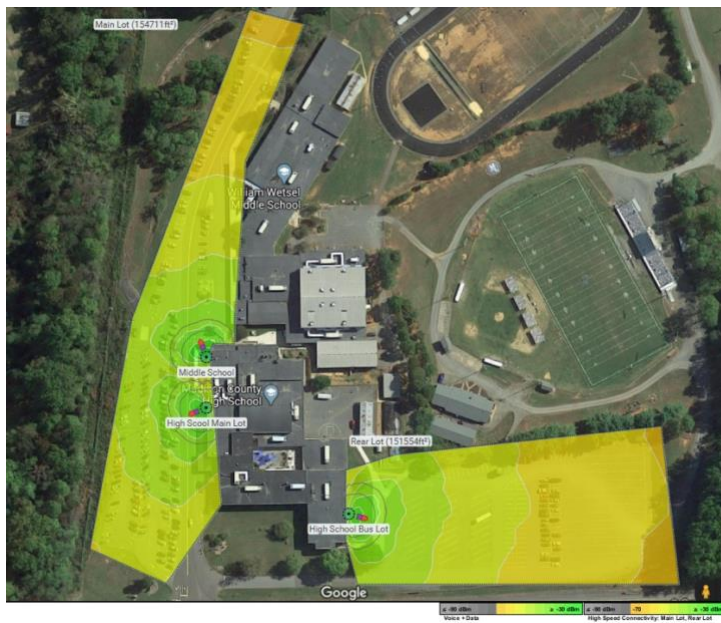

MCPS Internet Wi-Fi access is now available in school parking lots at Madison County High School and Waverly Yowell Elementary School to help our community during this period of school closures.

Here are some tips for accessing the Wi-Fi signal:

- Personal devices can connect to the “Madison-Public” network.
- MCPS staff and student devices can connect to “Madison-Private” or “Madison-Public” networks.

We hope this increased access can help our community members have access to information via the Internet.

See heat maps below for areas with best coverage:

*Note areas in green have the best signal strength and then weakens from yellow to orange.

In addition, please note that service may not be uninterrupted or error-free, but MCPS Technology will monitor daily to help address potential issues.
